Yes Buy with confidence! L2B offers Authentic Genuine UL electrical and fire-safety tested and certification under UL 2272, Electrical Systems for Self-Balancing Scooters. This standard evaluates the safety of the electrical drive train system and charger system combinations are all uL listed for fireproof safety. Beware of fake UL sticker and UL only on charger.

We truly strive to make identifying a UL Certified product as easy as possible. Simply look for the UL Mark for self-balancing scooters on the front of the packaging and the UL holographic certification label with the Enhanced Mark on the bottom of the product. This label is your indication that you have a genuine UL Certified product.

A full charge of this machine will give you 2-3 hours of riding fun which translates to roughly around 15 miles. Be sure to have your helmet and knee pads ready if this is your first time riding the self balancing Hoverboard as this is like learning to ride the bike all over again, though learning this takes less time. You will have more fun, fall less, and not stumble around.

INCLUDES CHARGER **Battery is included**

Don't be fooled by other hoverboards listed at much lower prices, often they list a fake UL certificate or they do not have the full board certified which is not safe. **Quality is everything!**

We make sure our complete hoverboard is UL2772 certified to make sure you and your loved ones stay safe and to prevent the risk of fire!

Hoverboard Electric Smart Self-Balancing Scooter 2Wheel Skateboard

You will love this hoverboard.! Best Model found on ebay .Battery is included
